EDUCATION

Methodist College of Engineering & Technology

B.E. in Computer Science and Engineering (AI & ML)

Hyderabad, India

Sep 2023 – Sep 2027

St Paul's High School, Hyderabad

High School Grade: 9.8

Graduated 2023

PROJECTS

beyondATS — AI Job Matching & Voice Screening

[GitHub](#)

Next.js 14, TypeScript, MongoDB Atlas, GPT-4o-mini, OpenRouter API, Retell AI SDK, Twilio

- Built a 4-stage AI hiring pipeline (resume parsing → hybrid skill matching → AI voice call → GPT-4o-mini evaluation) that cuts screening time to under 5 minutes; **3rd place at NYXORA MREM 2026 national hackathon**.
- Designed a hybrid matching engine: 70% semantic skill graph (40+ skill families with exact/fuzzy/transitive matching) + 30% 8-dimensional embedding vectors with cosine similarity, and gradient-based adaptive weight learning ($lr=0.03$) driven by employer invite/reject feedback.
- Integrated Retell AI + Twilio for real phone screening calls with dynamically generated questions per candidate resume; post-call transcript evaluated by GPT-4o-mini across 5 weighted dimensions (Technical Depth 30%, Communication 25%, Problem Solving 20%, Culture Fit 15%, Confidence 10%).

FlowStack IDE — Browser-Based IDE with Docker Isolation

[GitHub](#)

React, Node.js, Express, Docker, Socket.IO, MongoDB, Redis, JWT, Google OAuth, Monaco Editor, xterm.js

- Provisioned isolated Docker containers per project (Node / Python / Go / Rust images) with real PTY terminals via `node-pty`, volume-mounted workspaces, and live file-tree updates via `chokidar` streamed over Socket.IO.
- Built APEX AI agent (GPT-4o-mini via OpenRouter) that reads all workspace files as context, detects intent (build / fix / command / chat), scaffolds full React/Vite and Next.js projects, and pipes install commands to the terminal automatically.
- Secured the platform with JWT stored in `httpOnly` cookies, Google OAuth via Passport.js, and a Redis token blacklist for immediate session invalidation on logout.

WebRTC P2P Video Call App

[GitHub](#)

React, TypeScript, Vite, Node.js, Express, Socket.IO, WebRTC

- Implemented the full WebRTC handshake from scratch (`createOffer` → `setLocalDescription` → `answer` → `setRemoteDescription` → ICE candidate exchange) using Google STUN (`stun.l.google.com:19302`) for public IP discovery.
- Used Socket.IO exclusively for SDP/ICE signaling so that all video and audio flows peer-to-peer with zero server relay once the P2P tunnel is established.

AI Voice Agent for Automated Phone Calls

[GitHub](#)

React, Node.js, Express, Prisma ORM, SQLite, Retell AI SDK

- Built a full-stack AI customer support platform that automates voice call interactions using Retell AI, with persistent conversation history tracking via Prisma ORM and a real-time call analytics dashboard; **1st place at HackNovate 2025 national hackathon**.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL, HTML / CSS

CS Fundamentals: Data Structures, Algorithms, OOP, System Design, REST API Design, Agile

Frameworks: React, Next.js 14, Node.js, Express, Tailwind CSS, Prisma ORM, Mongoose, Socket.IO, Passport.js

AI & APIs: GPT-4o-mini, OpenRouter API, Retell AI SDK, LLM Integration, Prompt Engineering, REST APIs, Webhooks

Real-Time & Auth: WebRTC, WebSockets, JWT Authentication, Google OAuth 2.0, `httpOnly` Cookies, Redis Token Blacklist

Databases: MongoDB Atlas, Redis, MySQL, SQLite

DevOps & Tools: Docker, Git, GitHub, CI/CD Pipelines, Vite, VS Code, Twilio, `node-pty`, Monaco Editor

ACHIEVEMENTS

- 1st Place** — National-Level Hackathon, Google Developer Community (**HackNovate 2025**) — AI Voice Agent for Automated Phone Calls
- 3rd Place** — National-Level Hackathon, Google Developer Community (**NYXORA MREM 2026**) — beyondATS AI Hiring Platform
